

Sensory and Therapeutic services require a letter of recommendation from a licensed professional. The recommendation **cannot** come from the person or business providing the therapy, and his or her license should be on the letter.

The letter must clearly answer the following questions:

- What is the specific diagnosis?
- What specific impact does the diagnosis have on the child's life? (This may include medical, social, mental, etc.)
- What specific therapy or treatment does the specialist recommend?
- Why does the specialist recommend these?
- Has the child received the therapy or treatment before? If yes, have they been effective?
- What result does the specialist hope to achieve with this therapy or treatment?
- How long is the therapy recommended?
